

AUSTRALIAN MARINE DEBRIS INITIATIVE

Early years F-3

Lesson 9

Solutions

Introduction

Hi everyone,

Thanks for all your help doing the clean-up!

Did you find anything interesting? I hope it's something you would really like to do again, especially now you know how important it is.

This is my last letter to you for a while ... but before we say goodbye, I would really love you to do something that will help other people become more aware of the marine debris problem.

I have included an idea that a school came up with to help reduce rubbish in their environment.

I look forward to seeing what you do. Please take pictures of your work and send them to me.

Lots of love from your mate Malmo

A school in Far North Queensland came up with a great idea!

The school is called Laura State School in a place called Laura!

What items did you find in your beach or river clean-up that can be recycled?

www.library.thinkquest.org

Rdsdisposal.com

The students and teachers decided to make a recycling program for soft drink cans in the Cape York area.

The students decided to make a logo for their recycling program

So they had a logo competition in class! Here are some pictures of what the students designed.

They then combined them to make one picture.

What great team work!

This is how it all works ...

The school has 15 bags for soft drink can collection around the community.

When the bags are full, they get dropped at a roadhouse for a truck to pick them up.

The truck takes the cans to be recycled.

The money made from the recycling goes to the school and the Royal Flying Doctor Service.

Watch this beautiful song about the ocean we want to know
